

Job Title: Pipeline Engineer (Jr./Sr.)

Location: Panna, Madhya Pradesh

Department: Projects

Job Type: Full-Time

Experience Required: 3-6 years (preferred in government/EPC Projects)

Industry: Infrastructure / EPC / Government Contracting

Job Overview:

We are looking for a skilled and motivated Pipeline Engineer to join our site team in Panna (MP). The role involves execution, monitoring, and reporting of all activities related to pipeline installation and testing for a government water supply or irrigation project. The ideal candidate will have strong experience in civil works, pipe laying (DI, HDPE, MS), hydro testing, billing, client interaction, and field-level project coordination.

Key Responsibilities:

- **Pipeline Execution & Supervision**
 - Supervise and manage daily activities for pipe laying (DI, HDPE, MS, GI or other materials).
 - Ensure proper trenching, bedding, jointing, backfilling, and road crossing works as per specifications.
 - Interpret drawings and BOQs and execute work accordingly.
- **Hydro Testing & Commissioning**
 - Plan and execute hydro testing of various pipeline materials.
 - Coordinate with testing teams and ensure documentation is completed and approved.
- **Measurements & Quality Control**
 - Take accurate site measurements and maintain detailed field records.
 - Ensure pipeline laying is done as per technical standards and quality norms.
 - Perform on-site quality checks during and after installation.
- **Billing & Documentation**
 - Prepare running account bills, measurement sheets, and joint measurement records (JMRs).
 - Coordinate with QS team for timely submission of bills.
 - Maintain DPRs (Daily Progress Reports) and documentation for inspections.

- **Client & Contractor Coordination**

- Regular liaison with government officials, PMC teams, and client representatives.
- Attend review meetings and inspections as and when required.
- Communicate effectively with subcontractors, vendors, and material suppliers.

Required Skills & Qualifications:

- B.E./Diploma in Civil Engineering from a recognized institution.
- Minimum 3–5 years of experience in pipeline execution (DI, HDPE, MS) under government contracts.
- Hands-on knowledge of pipe laying techniques, hydro testing, measurement recording, and site billing.
- Proficient in reading construction drawings, IS codes, and specifications.
- Strong knowledge of standard safety protocols and quality control measures.
- Familiarity with MS Excel, AutoCAD, and basic project management tools.
- Excellent communication skills for client coordination and site team leadership.

Preferred Attributes:

- Experience in Jal Jeevan Mission / AMRUT / Irrigation Department Projects.
- Knowledge of site-level troubleshooting and execution planning.
- Willingness to stay and work in semi-urban/rural project locations.
- Good command of Hindi and English; knowledge of local dialects is an added advantage.

Remuneration

As per industry standards, commensurate with experience and skillset. Accommodation may be provided near the site if required.
